Now serving restaurants, malls, hotels, and more

Streamlined dining. Better service. More traffic. Anytime Link helps you offer a 21st-century customer experience whether you own restaurants, manage hotels, or operate food trucks.

Get a **real app** that gets you more business

Anytime Link delivers a real, functional app for iOS and Android devices. It's your name and your content, and it comes with features customers can't live without.

We'll help you brand it, and the simple system makes adding your content easy. Whether you have one location or many, soon patrons will be browsing your menus, placing orders, and giving you more business.

- ✓ Offer a real, functional app for iOS and Android devices.
- ✓ Use your brand, and include features customers actually use.
- ✓ Improve your customer experience and make more sales.

Dine-in

Pickup

Turning more tables for restaurants

Serve more convenience, serve more customers.
Anytime Link adds flexibility to your experience no
matter what type of dining you offer.

Delivery

Save time thanks to the **simple system**

It's two parts: the admin zone and your app. Put your content into the admin zone's basic forms, and it shows up in your app with a stunning look and feel.

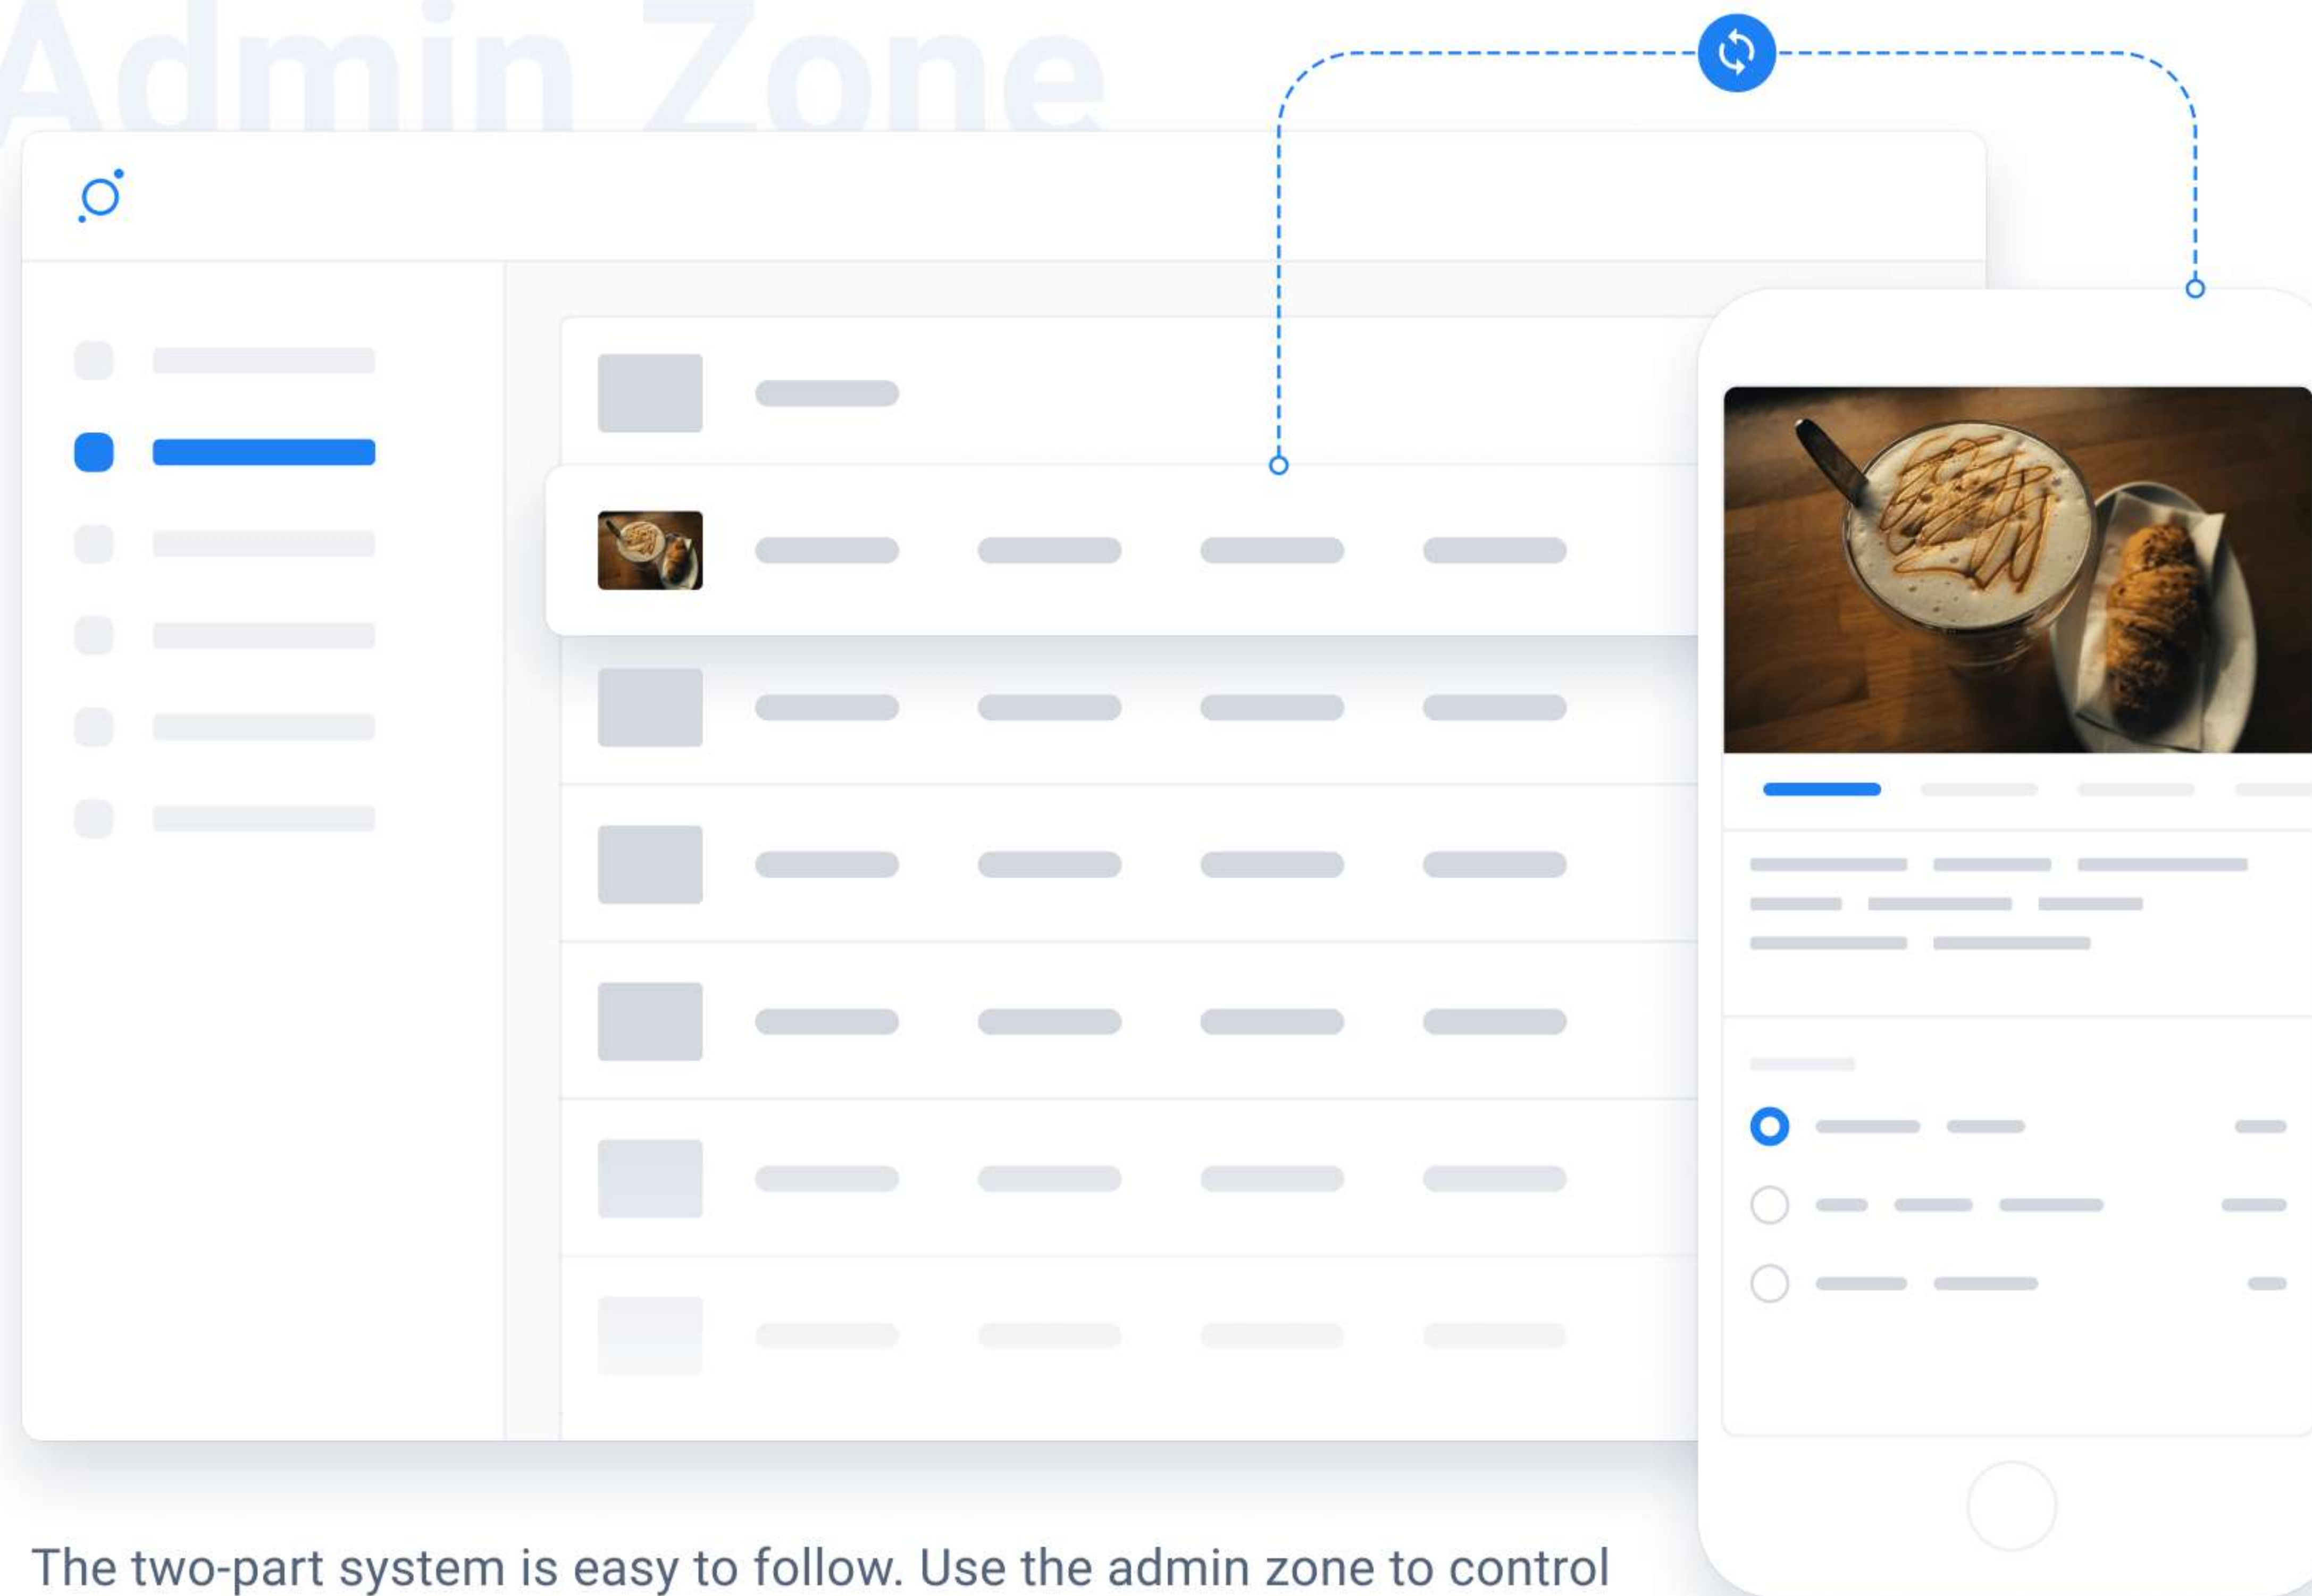

The intuitive framework means less time at the screen, whether you need to add a new menu or make changes across the board.

- ✓ Fill out simple forms, watch your content show up in your app.

- ✓ Catch on fast - if you're reading this, you're ready to get started.

- ✓ Are you a techie? Put your skills to work with advanced features.

Admin Zone

The two-part system is easy to follow. Use the admin zone to control your content, and see it all show up in your app.

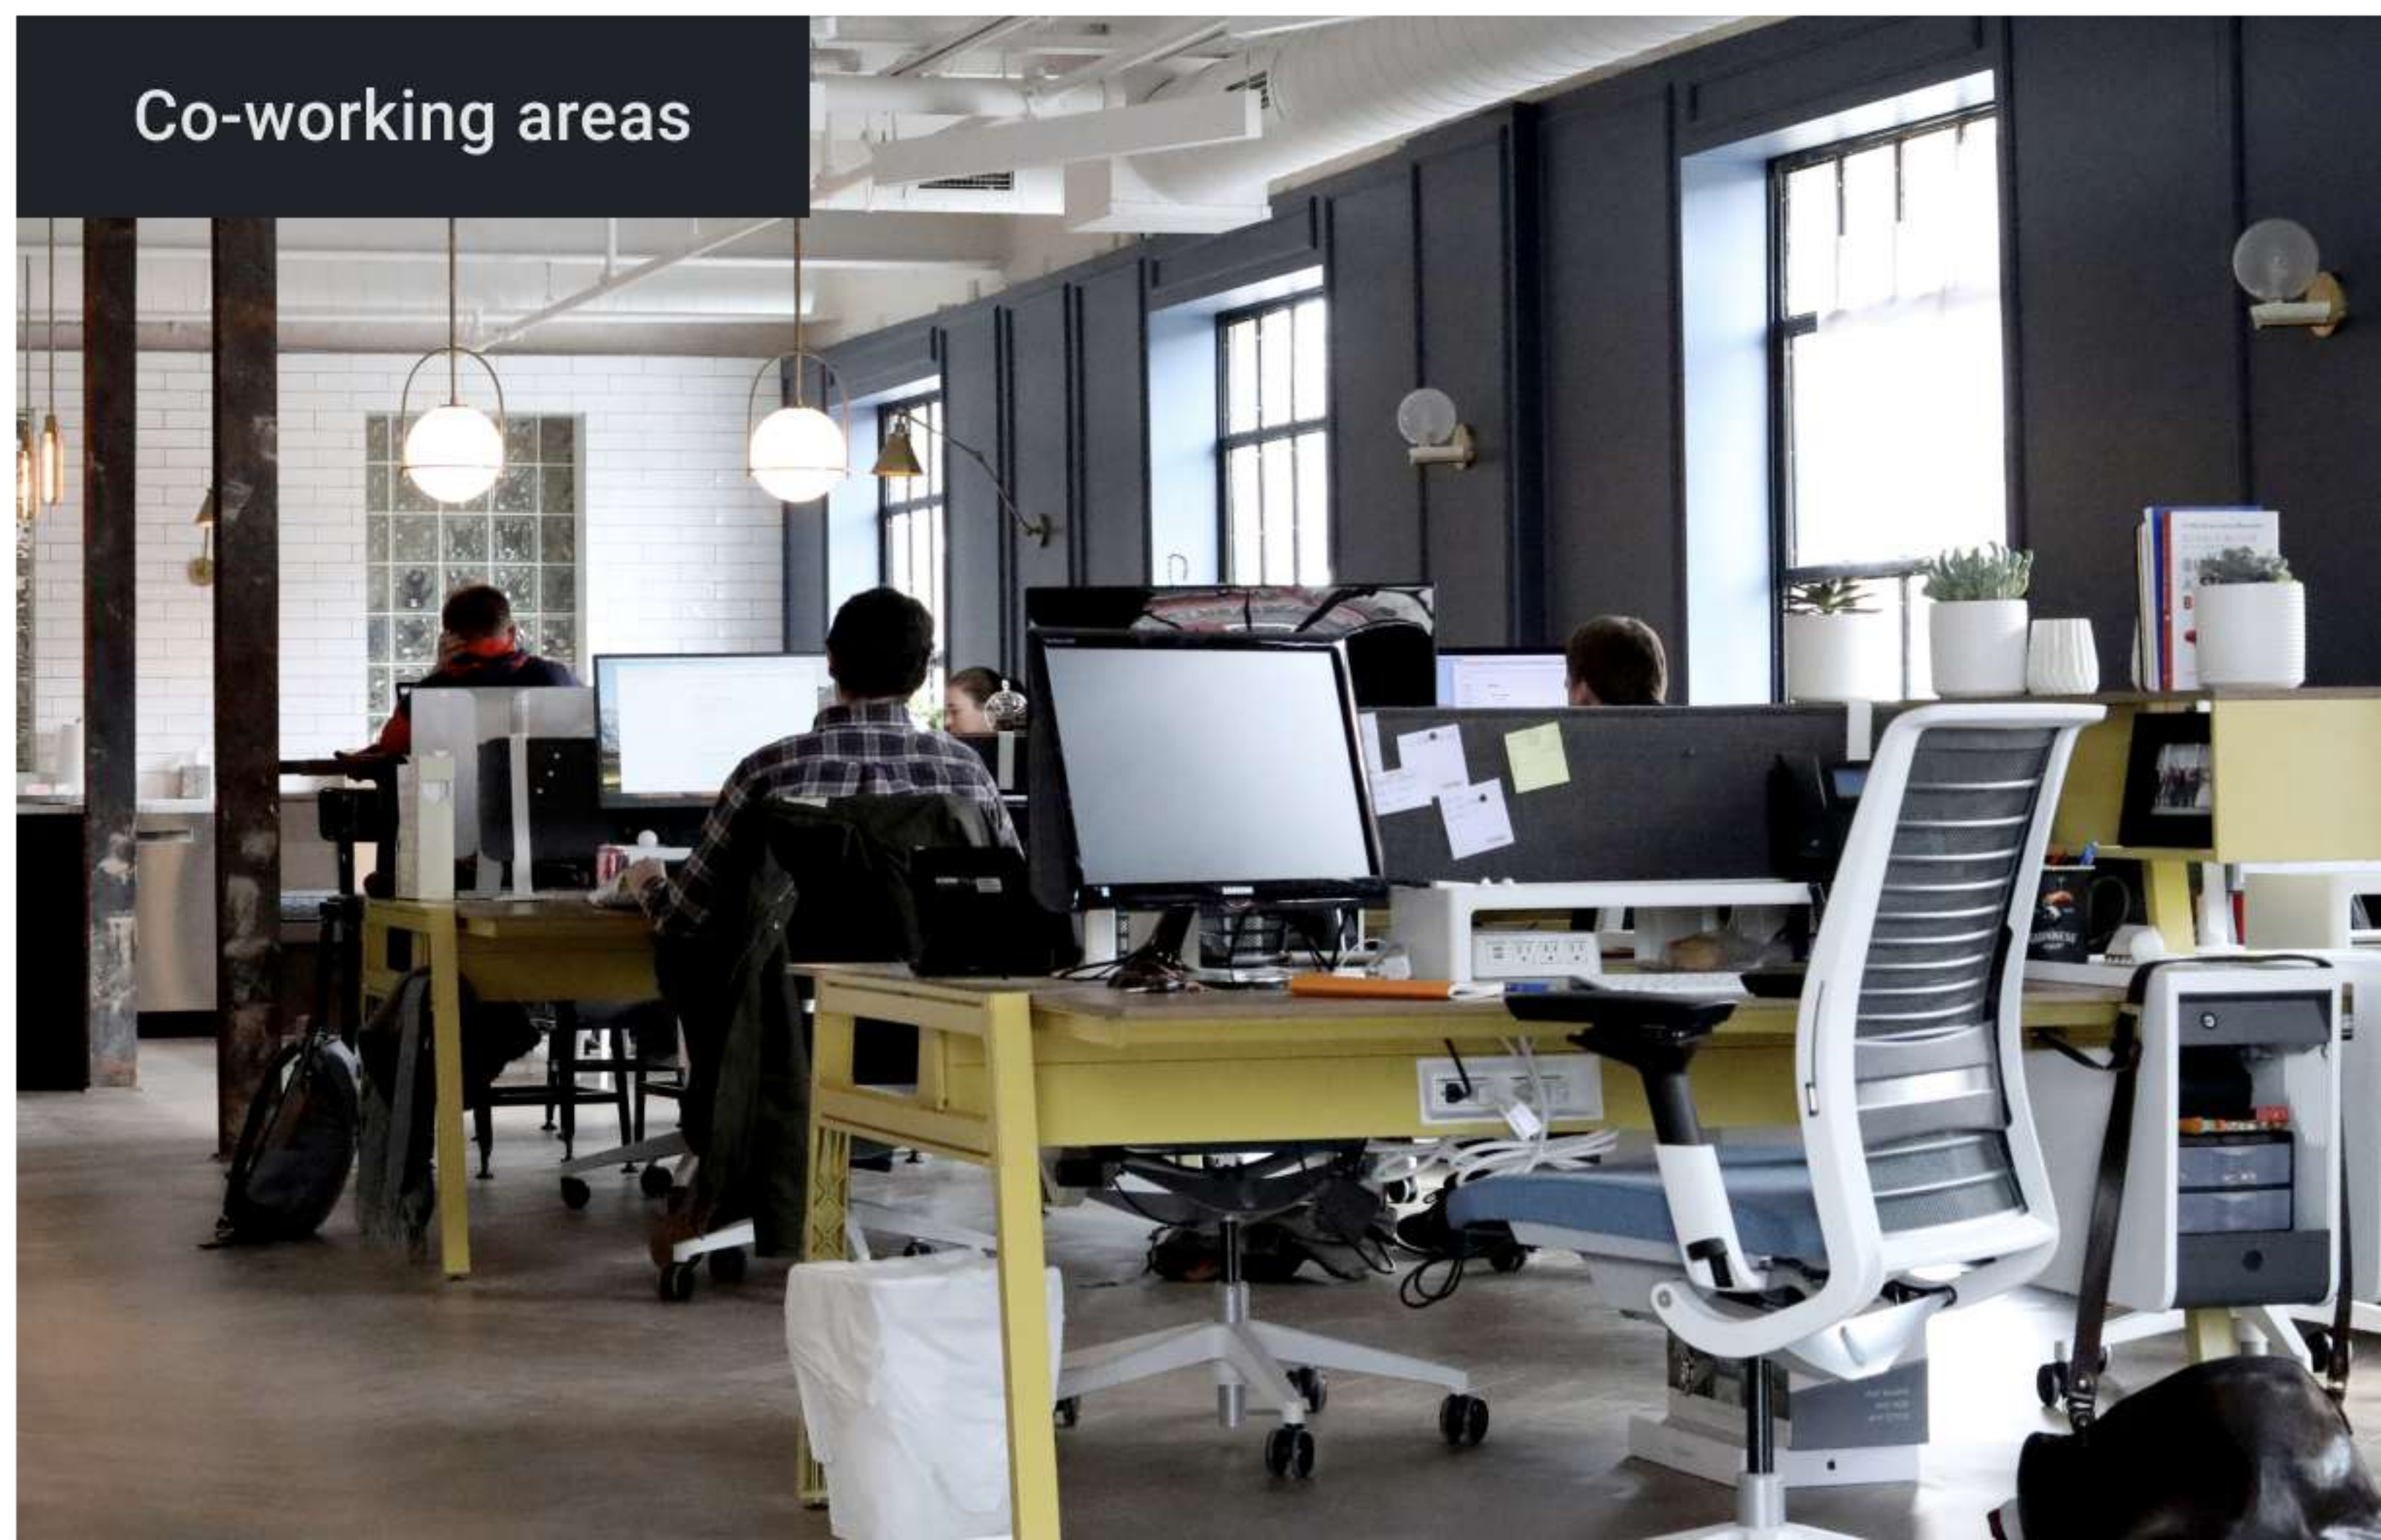

Shopping malls

Business plazas

Helping food courts raise more revenue

Get more from your space. Anytime Link helps you increase earnings per square foot in your business plaza, shopping mall, or co-working area.

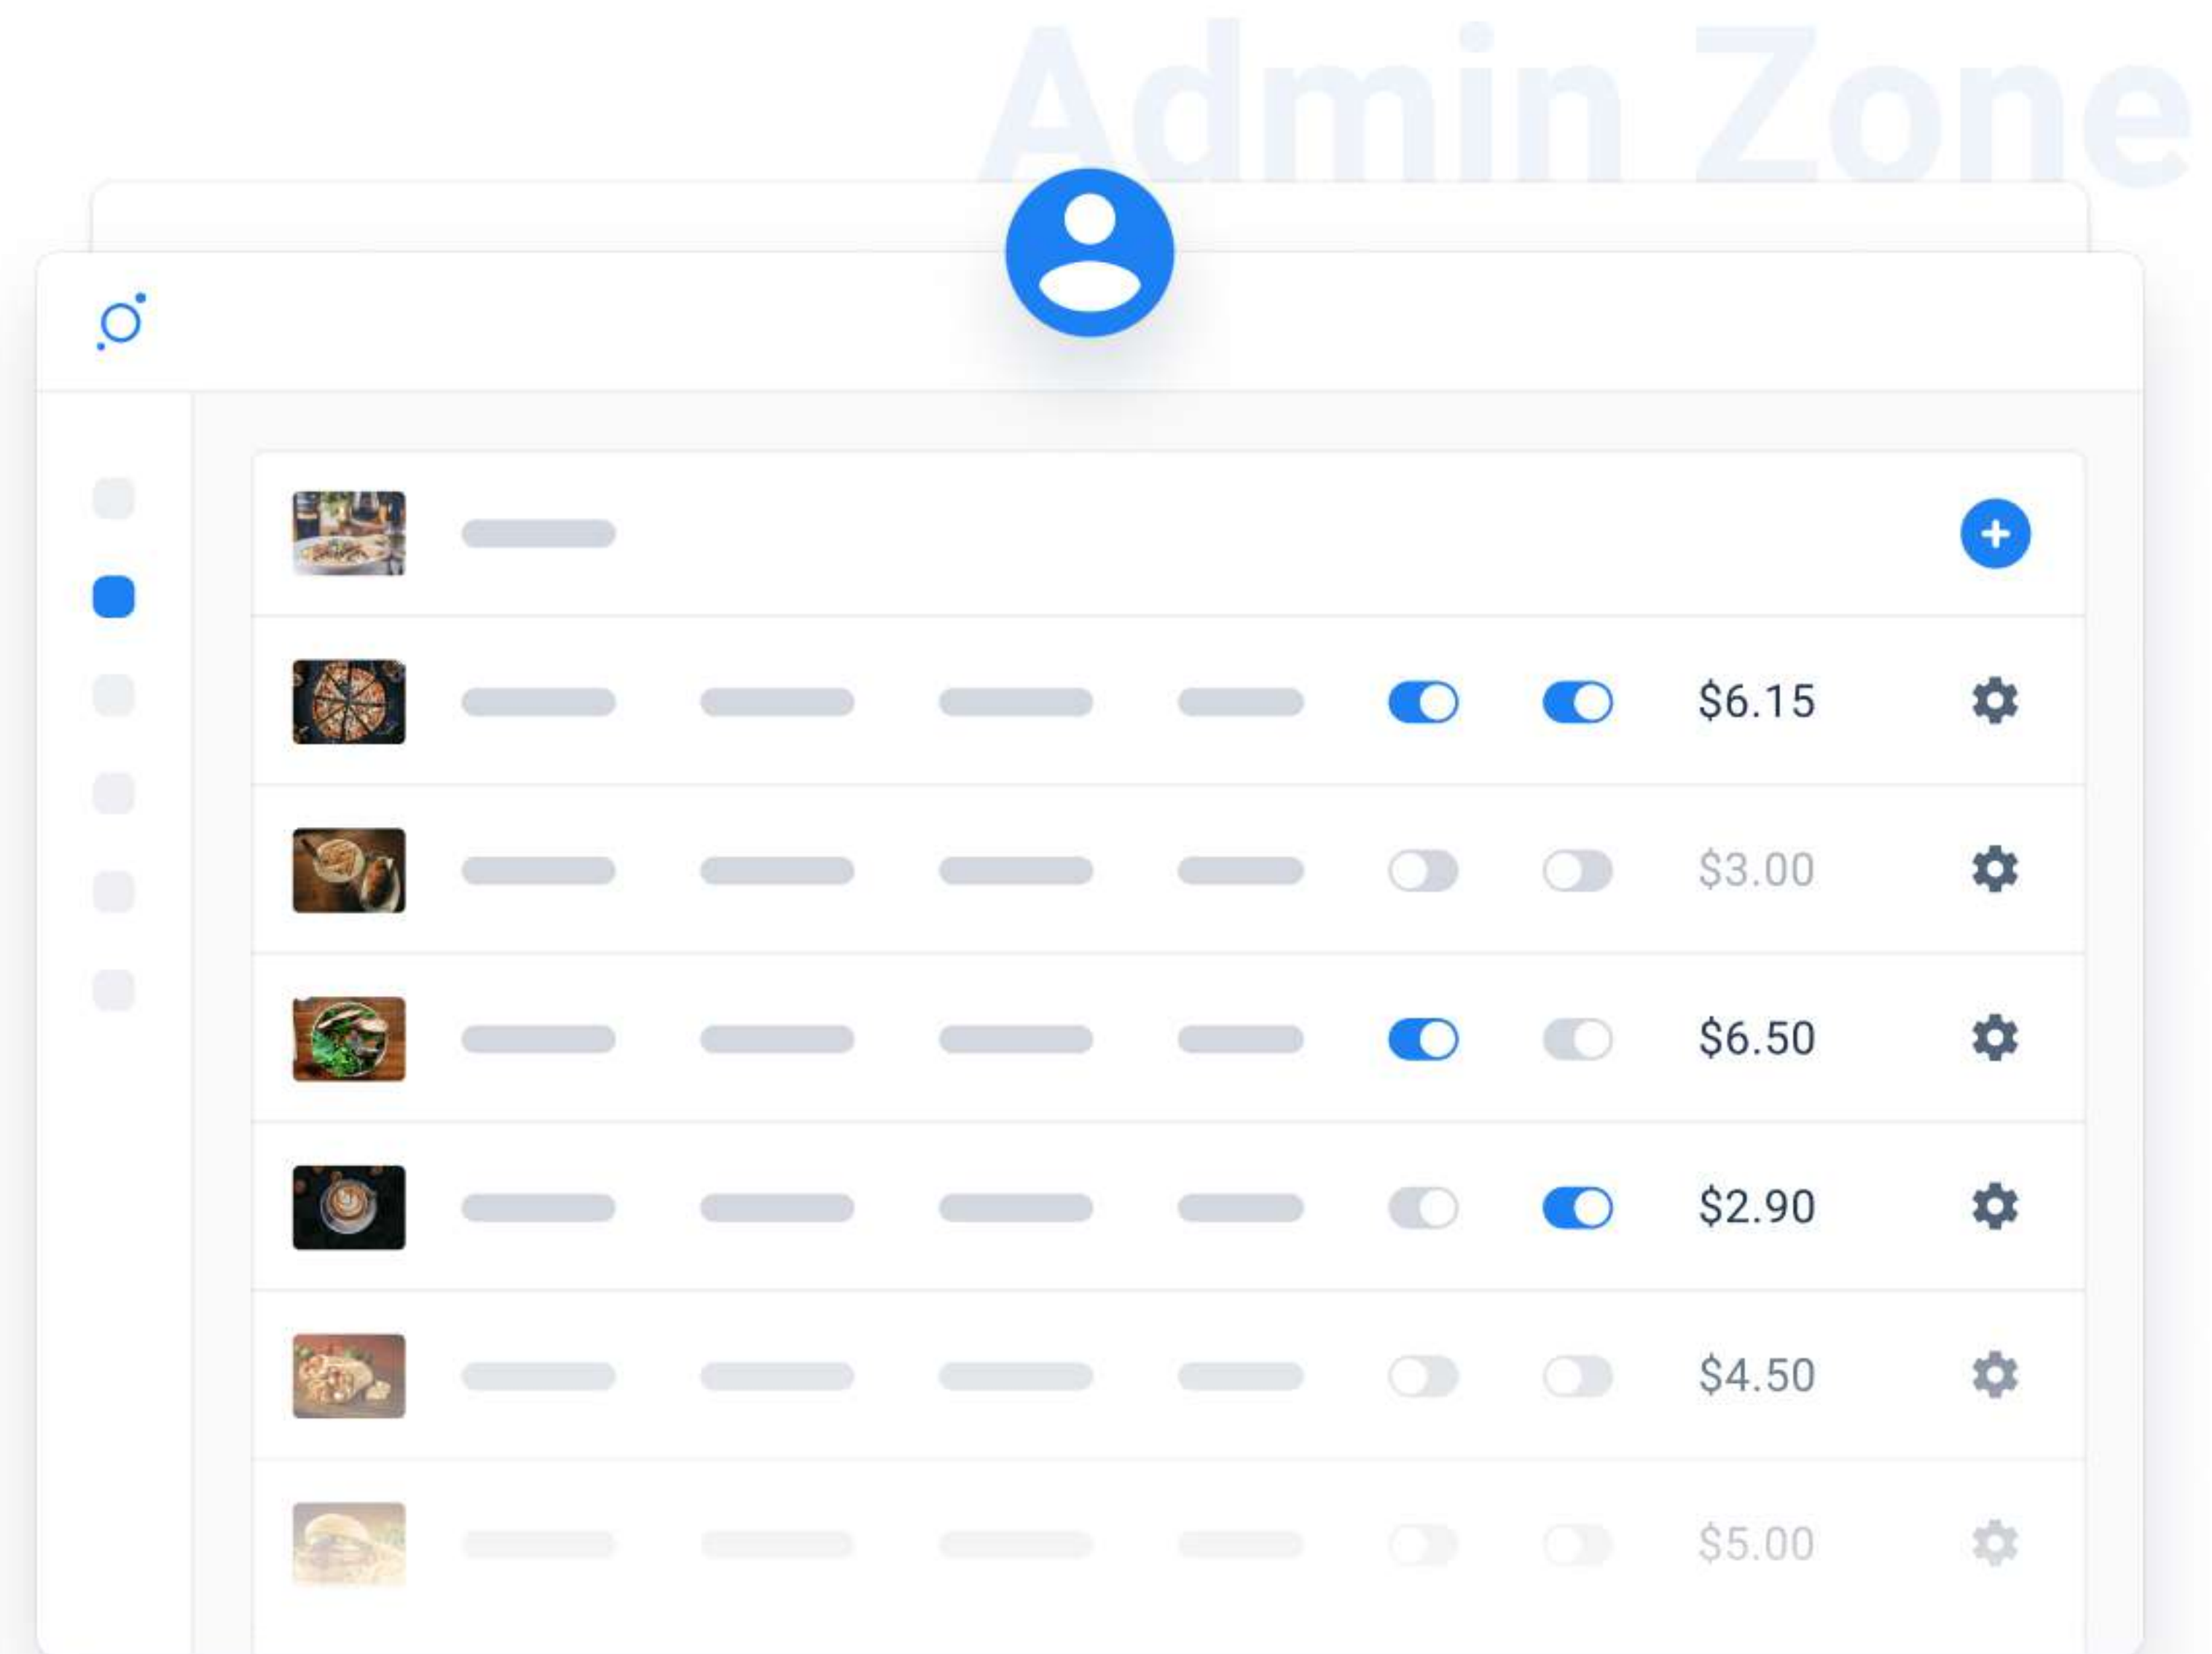

Co-working areas

You're **in control**. Don't worry — we made it easy

- ✓ Easily handle your content thanks to the clear-cut system.
- ✓ Take charge of menus, items, prices, images, and much more.
- ✓ No more guesswork — preview your changes instantly.

Control menus, item prices, seasonal dishes, and so much more. **The admin zone puts you in charge of everything that goes into your app.**

Forget about guesswork — preview mode shows changes in real time, so you can see your adjustments as you make them. When you're ready to publish, your changes show up instantly in your app.

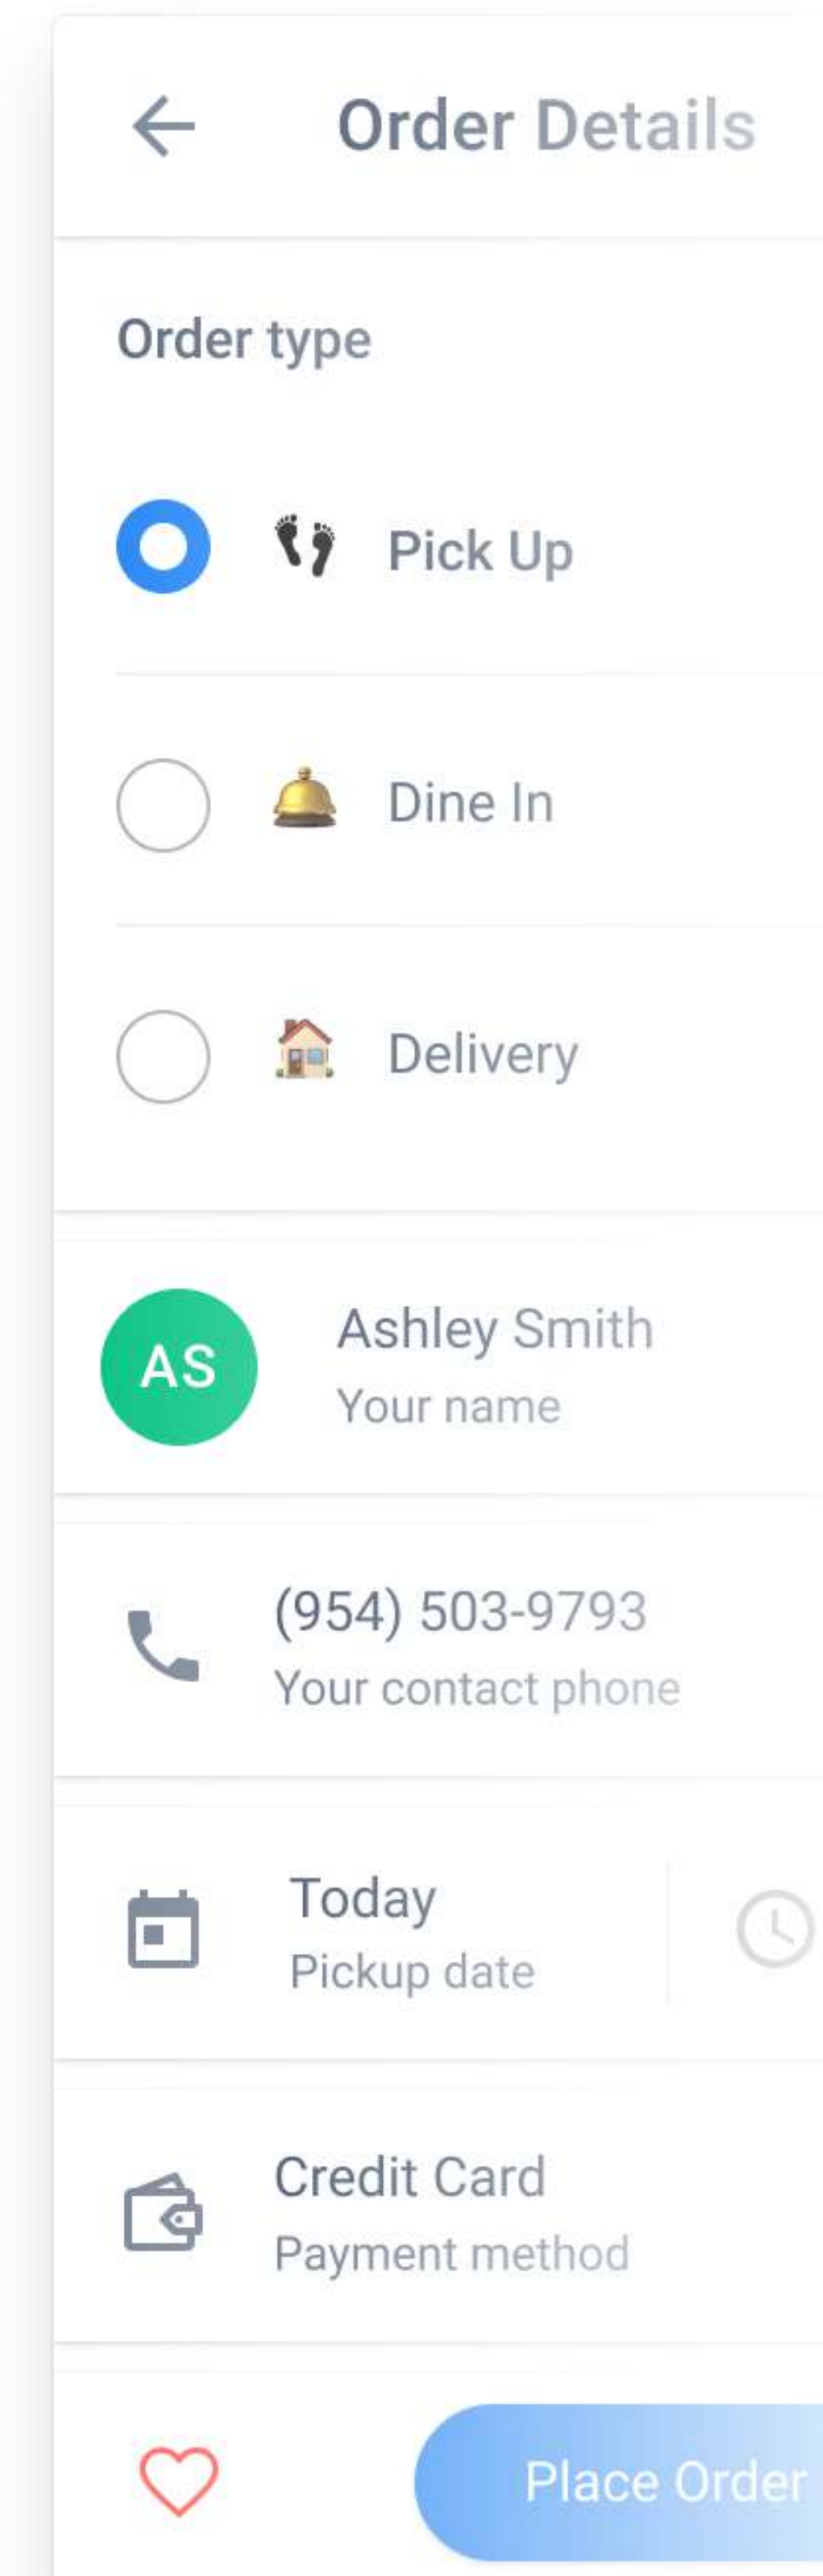

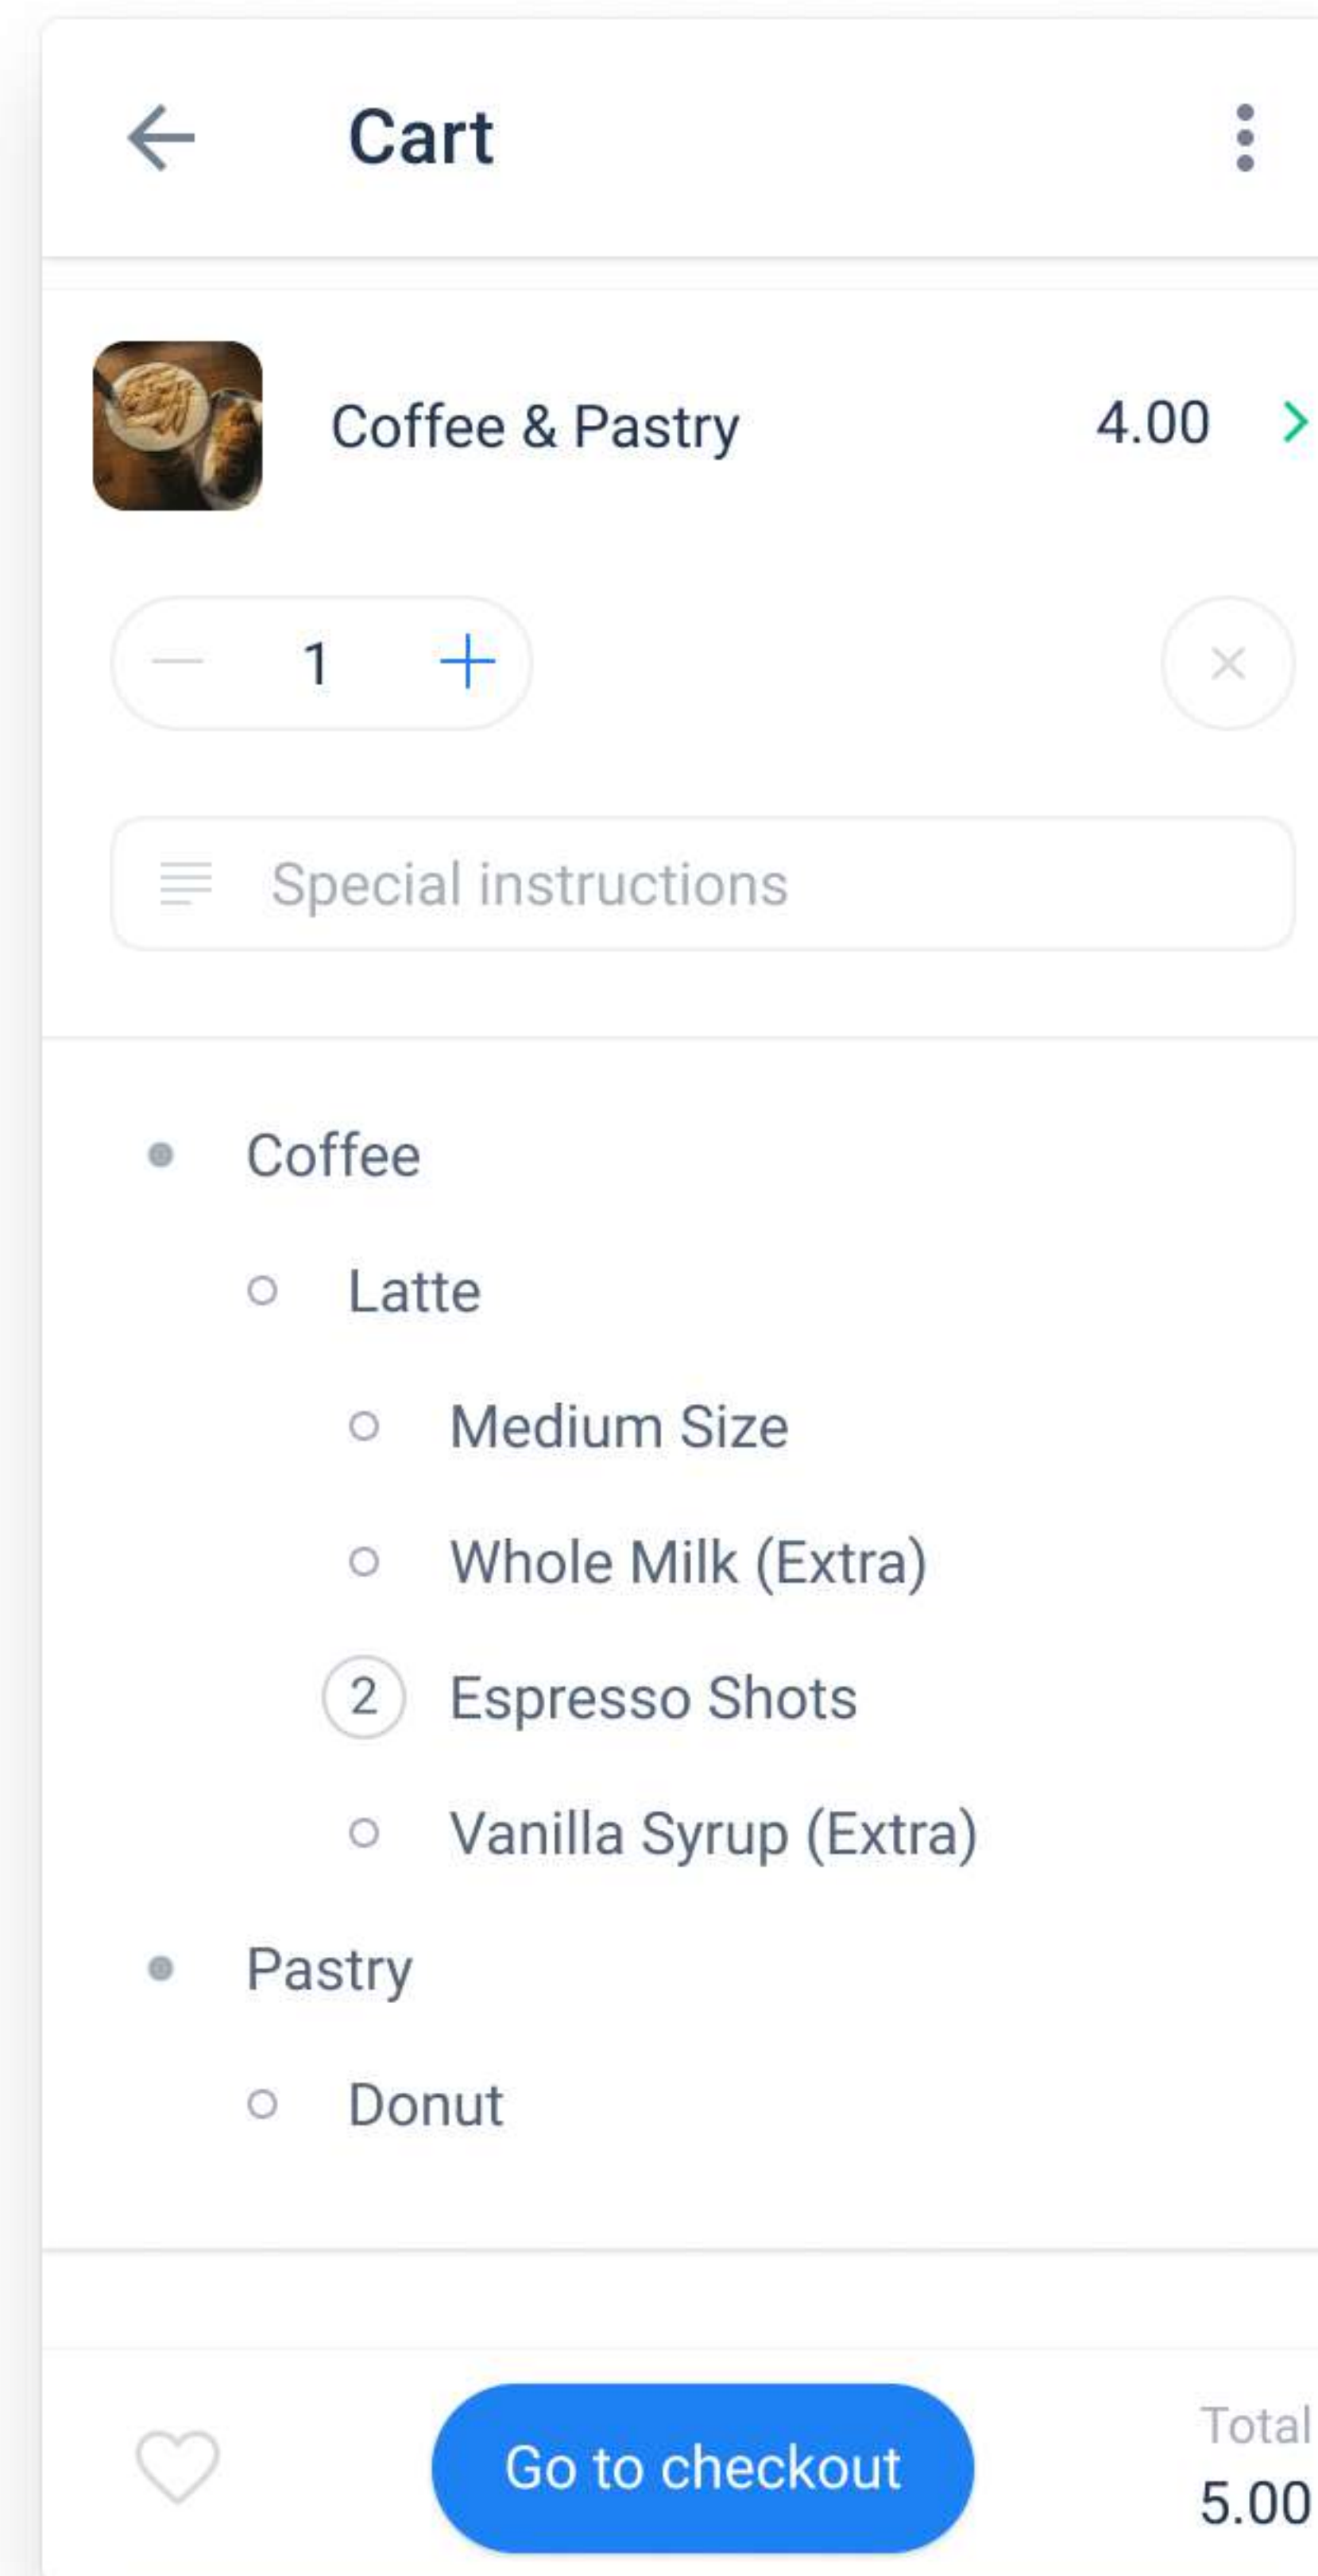

Bag more orders with effortless ordering

Get business with ease thanks to handy ordering features. Customers simply choose what they want and your app walks them through the rest.

Tracking and Notifications keep them up to date with their order. When they want more, reordering is a breeze when they use Favorites and Order History.

- ✓ Provide hassle-free ordering through your app.
- ✓ Offer transparency with Order Tracking and Notifications.
- ✓ Give them easy ways to reorder thanks to Favorites and Order History.

Improve satisfaction with detailed orders

- ✓ No more mixups - orders come directly from patrons.
- ✓ Improve order fulfillment and customer satisfaction.
- ✓ Keep them informed while they wait thanks to Order Tracking and Notifications.

Put more smiles on customers' faces. Every order comes right to you for a full picture of everything they want. Fulfill orders with greater accuracy and increase satisfaction.

While they wait for their order, keep them posted with Order Tracking. Use Notifications to chime in with updates every step of the way. Patrons don't have to tie up your staff because they know just what to expect.

The screenshot displays a mobile application interface for order management. At the top, a summary bar shows a delivery order of 6 items for \$45.00, with a status of 'Pending approval', a 6-minute time passed, and contact information for Brandon Fields.
